Art Unit: 3634

The proposed drawing change (new Figure 12) has been approved by the Examiner. Furthermore, an additional change to Figure 12 has been made by the Examiner, i.e., element 34' has been added to describe the third clutch.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification, the following change has been made:

On page 14, line 25, --34' (shown in Figure 12)—has been inserted after "clutch".

In the claims, the following changes have been made:

In claim 1, line 24, "can be rotated" has been changed to --is rotatable--;

In line 25, "can be successively rotated" has been changed to
--is successively rotatable--;

In claim 4, line 25, "can be rotated" has been changed to --is rotatable--;

In lines 26-27, "can be successively rotated" has been changed to
--is successively rotatable--;

In claim 5, line 30, "can be rotated" has been changed to –is rotatable--;
and

In line 31, "can be successively rotated" has been changed to
–is successively rotatable--.

Authorization for this examiner's amendment was given in a telephone interview
with Mr. Neimark on 9/13/2005.

Claims 1-5 are allowable.

The following is an examiner's statement of reasons for allowance: the recitation of a power device in combination with a vehicle door comprising a rear door latch unit, a swing arm coupled with a ratchet of the rear door latch unit releasing the latch of the door when rotated, a first clutch interposed between an output shaft of a motor and a wire drum, a second clutch interposed between the output shaft of the motor and the swing arm and the swing arm being rotatable through the first clutch and the wire drum is successively rotatable through the second clutch by a continuous rotation of the motor executed once or a power device in combination with a vehicle door comprising a door latch unit, a cable take-up unit coupled with a latch of the door latch unit rotating the latch from a half-latched position to a full-latched position when rotated, a first clutch interposed between an output shaft of a motor and wire drum, a second clutch

interposed between the output shaft of the motor and the cable take-up unit, and the cable take-up unit is rotatable through the first clutch and the wire drum is successively rotatable through the second clutch by the continuous rotation of the motor executed once is seen as an unobvious improvement over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number 571-272-6835.
